Next Meeting: Monday, January 13, from 1 - 3 pm, Computer Room classroom, Anthem building

Happy New Year!

As we enter into 2020, I would like to wish everyone happy and healthy days to come! Our first PUG meeting of 2020 will be on Monday, January 13th from 1 - 3 pm in the Computer Room classroom in the Anthem building. We have much to learn and share and plenty of places to visit where we can practice our photography skills! All members in good standing with the Computer Club are invited to join us at our meetings. We welcome all with photography skills ranging from beginner to professional expert! There is something for everyone at our meetings! Our Photo Trips are open to all members, their family members, and friends.

This month our Photo Review theme is "Color." Your photos of anything that represents, for you, the word "color" should be sent to susanbarcomb19@gmail.com. Please send your photos no later than this Friday, January 10th or at the very latest, Saturday, January 11th.

Our Photo Talk segment is for anyone who would like suggestions for improving a particular photo or photos. You have an opportunity to show your photo(s) and ask how you could have taken the photo(s) from a different perspective, with different lighting, composure, etc., with different camera settings, or how you can improve your photo(s) with post photo editing. We discuss your needs and make suggestions. Then you can re-take or edit the photo and show it again at our next meeting. We share our ideas and learn by them! Please send your photos for Photo Talk to Mort Smith at misconstl@cox.net by Friday, January 10th or Saturday, January 11th..

There will be a presentation this month on Astro Photography, by one of our expert photography members. I think we'll all enjoy his photos and learning what preparation and camera settings were required for taking his photos.

There will also be a presentation on taking better photos with an iPhone. Perhaps even the most experienced photographers will learn something here!

Gene Kennedy, another of our expert photographers, will be offering a class on photo editing with Photoshop for all Computer Club members. This class will be appropriate for all levels of photography skills, including those using phones to capture images. Gene will show you how to enhance your photos with some fairly easy editing processes. This class will begin in February or March. Please look for more information on the Computer Club Web Site at computer.scaclub.org in the current and coming Newsletters and on the Class Schedule.

Come to our January Photo Group meeting and enjoy the friendship, participate in the group discussions, and learn something you didn't know before! See you on Monday the 13th!
